OBJECTIVE

This Data Generation Guidelines for 2014 Occupational Wages Survey (OWS) will serve as guide to facilitate the generation of output tables needed in the preparation of the publication tables for the 2014 OWS.

Preparatory activities should be done by concerned personnel before generating desired statistical tables. In addition, status codes need to be reconciled and necessary adjustments should be made before the generation of such tables.

From the 2014 OWS, the following statistics will be generated:

- occupational wage rates (average of current rates) and employment of time-rate workers on full-time basis in selected industries and selected occupations
- median basic pay and allowances of time-rate workers on full-time basis by industry/region
- distribution of time-rate workers on full-time basis by basic pay and allowance intervals by industry/region
