FOREWORD

This publication presents the results of the 2016 Annual Poverty Indicators Survey (APIS 2016). This survey round is the eleventh in a series of poverty surveys since 1998 and it is designed to provide information on the socio-economic profile of families and other information related to their living condition.

It provides information on the demographic characteristics, education, economic characteristics, housing characteristics, access to safe water supply and sanitation, expenditure and income of the families, and other information that can be used to assess and monitor the poverty situation in the country.

The report aims to provide statistics to the planners and policy makers as inputs to planning, assessment and evaluation of the various programs designed to reduce poverty incidence in the country. The APIS offers data for general public, researchers, or institutions which may be used for studies related to poverty and its correlates like education; water, sanitation and housing; and employment.

The Philippine Statistics Authority (PSA) wishes to extend its sincerest gratitude to the individuals and organizations who contributed to the successful completion of the APIS 2016. Above all, we thank the thousand of households who generously shared their time, effort and information during the data collection.

BACKGROUND

The 2016 Annual Poverty Indicators Survey (APIS) is the eleventh in a series of poverty indicators survey conducted nationwide since 1998. The survey gathers data that can be used to generate income and non-income based poverty indicators to assess and monitor the poverty situation in the country. It was the third APIS that utilized a more detailed set of questions that gather information about family income.

Objectives of the Survey

The APIS is designed to provide estimates for income and non-income indicators related to poverty. It gathers data on the socio-economic profile of families and other information that are related to their living conditions.

Specifically, it generates information on indicators that are correlated with poverty in order to:

1. Determine family income;
2. Determine family expenditure pattern;
3. Determine the percent distribution of families in relation to the following indicators:
 - a. ownership or owner-like possession of house and lot and the types of the materials of the roofs and walls of their housing units;
 - b. access to safe water and sanitation and type of toilet facility they use in their homes;
 - c. children 6-11 years old enrolled in Grade I to Grade VI;
 - d. children 12-15 years old enrolled in Grade VII to Grade X;
 - e. with members 18 years old and over who are gainfully employed and with working children 5-17 years old;
 - f. loan availed and its sources;
 - g. with members who received social protection and the total amount received for the period January-June 2016; and
 - h. awareness on drug abuse problem and prevention.

Sampling Design

The 2016 Annual Poverty Indicators Survey (APIS 2016) utilized the 2013 Master Sample (2013 MS) for household-based surveys of the Philippine Statistics Authority (PSA). The 2013 MS is designed to produce reliable quarterly estimates of selected indicators at the national and regional levels. The design can also provide reliable province level estimates after completing four quarterly rounds.

In the 2013 MS, each sampling domain (i.e, province/HUC) is subdivided into numbers of exhaustive and non-overlapping area segments known as Primary Sampling Units (PSUs). Each PSU is formed to consist of about 100 to 400 households. A single PSU can be a barangay/Enumeration Area (EA) or a portion of

a large barangay or two or more adjacent small barangays/EAs. For the whole country, about 81 thousand PSUs are formed from more than 42 thousand barangays.

From the ordered list of PSUs, all possible systematic samples of 6 PSUs were drawn to form a replicate for the most of the province domain or 75 out of 81 provinces. On the other hand, for the majority of highly urbanized cities, all possible systematic samples of 8 PSUs will be drawn to form a replicate.

The APIS 2016 used one replicate of the quarterly sample of the MS or about 11,000 sample households deemed sufficient for national estimates.

Response Rate

Of the 10,642 eligible sample households for the APIS 2016, 10,332 were successfully interviewed. This translated to a response rate of 97.1 percent at the national level. The response rate is the ratio of the total households who were completely interviewed to the total eligible households. Eligible households consisted of households who were completely interviewed, refused to be interviewed, temporarily away, not at home or on vacation, and those located in critical or flooded areas during the survey period.

Limitations of the Data

Data gathered from APIS are results of a sample survey and are therefore subject to sampling variations, that is, sampling errors are expected since the data are not obtained through complete enumeration or census.

The survey covered a national sample of households deemed sufficient to provide estimates about the population at the national level only. Hence, tabulations and cross-tabulations of variables at lower geographic levels are not generated since these may not be statistically reliable.

Survey estimates may also be affected by non-sampling errors such as deliberate under or over reporting of income and expenditures or unwillingness on the part of the respondents to reveal their true levels of income/expenditures.

Moreover, considering that both cash and non-cash expenditures and income are gathered in APIS, valuation of non-cash income and expenditures may cause some problems. The instructions are to use market prices prevailing in the locality for goods and services received as gifts, and farm gate prices for goods consumed from own production. However, market prices may not be available for all items in the locality or market prices/farm gate prices may be highly unpredictable for different localities.

Furthermore, data users attempting to match the APIS and the Family Income and Expenditures Survey (FIES) should take note of the differences in the reference period. The FIES is conducted in two visits covering the periods January to June and July to December while the APIS covers January to June only.

Survey Questionnaire

APIS Form 1 is the survey questionnaire that contains questions on the following topics:

- **Geographic Identification and Other Family Information** - region, province, municipality, barangay, address, design codes, result of visit and code, names of household head and respondent and the certification portion.
- **Demographic Characteristics** - obtain information of all family members such as name of family head, relationship to the head, sex, age and marital status.
- **Schooling Status and Highest Grade Completed** - determines whether a family member aged 3 to 24 years is currently attending formal school, and if so, the grade or year the member is currently attending. If not attending, then the reason for not attending school is asked. It determines if the family members 3 to 5 years old are attending/have attended early education or learning system in order to assess their 'school readiness'. It also determines the educational attainment of the family members 5 years old and over.
- **Economic Characteristics** - obtain information on the job or business of each family member 5 years old and over have during the past six months. It also includes questions on occupation and business the family member engaged in.
- **Drug Awareness and Prevention** – obtains information about family's knowledge and/or perception about drug problem in the barangay or community. It also determines the awareness of family on the various programs or activities being implemented to address the drug problem in the barangay or community.
- **Housing, Water and Sanitation** - obtains information about the family's housing characteristics and conveniences/amenities owned by the family. The main source of water supply and kind of toilet facility they used.
- **Other Relevant Information** - to determine whether or not the family makes use of any form of credit in financing the family's needs. It also determines the source of loan. Also obtains information if a family member experienced hunger because he or she did not have food to eat.
- **Social Protection** – obtains information about programs that seek to reduce poverty and vulnerability to risks and enhance the social status and rights of the marginalized by promoting and protecting their livelihood and employment, protecting them against hazards and sudden interruptions or loss of income, and improving their capacity to manage risks.

- **Family Expenditures** - determines the expenses made by the family purely from family members' personal consumption.
- **Income** - obtains information on the employment status of each family member 10 years old and over. It also includes questions on occupation and business the family member engaged in during the past six months and salaries and wages from employment of each working family member.
- **Net Share of Crops, Fruits and Vegetables Produced, Aquaculture Products Harvested or Livestock and Poultry Raised by Other Households** - this is the net share from crops, fruits and vegetables produced, aquaculture products harvested or livestock and poultry raised by other family even without a landlord-tenant relationship.
- **Family Sustenance Activities (FSA)** – includes activities in the production of goods mainly for home consumption only and if there was a disposal, consumed and/or a small proportion was sold, given away, etc. during the reference period.
- **Other Sources of Income** - obtains information on other sources of income not derived from work.
- **Entrepreneurial Activities** – are activities that determine if any member of the family is engaged as operator or self-employed in any agricultural or non-agricultural family-operated activities. If engaged, this section asks for the total net income, value consumed and value given away as gifts of the products derived/produced from such activity.

Concepts and Definitions

Bottom 30% – The Bottom 30% refers to families in the bottom 30 percent of the total income distribution arranged in descending order of the family per capita income. This grouping of families was used as a proxy for those falling below the poverty line.

Top 70% – The Upper 70 % refers to the upper 70 percent of the total families in the income distribution arranged in descending order of the family per capita income. It is the complement of the bottom 30 percent.

Respondent – An adult knowledgeable member of the sample family who can provide accurate answers to all or most of the questions in the survey.

Family – Aggregate of persons bound by ties of kinship, who live together under the same roof and eat together or share in common the family food. For the purpose of this survey, a family can be classified as a nuclear family, extended family or a single person family. For a household comprising of members who are not related with each other by blood, marriage or adoption, only the head of the household is considered. This case is a single person family.

Family head - An adult member of the family who is responsible for the care and organization of the family or who is regarded as such by the members of the family.

Highest educational attainment - The highest grade or year completed in elementary and post secondary schools, colleges or universities.

Work - Any activity a person does for pay, profit or without pay on family farm or enterprise, or an activity done by a farm operator or member of his family on another's farm on "exchange labor" arrangement. In addition, any activity that a person does during the reference period in relation to minor activities such as home gardening, raising of crops or fruit bearing trees, raising hogs/poultry, and fishing for home consumption, and manufacturing for home use are also considered as work.

Floor area - The area enclosed by the exterior walls of the housing unit. In case of several floors, the area of the housing unit is the sum of areas of all floors.

Family expenditures – refer to the expenses or disbursement made by the family purely for personal consumption during January to June 2016. Value consumed from net share of crops, fruits and vegetables produced, aquaculture products harvested or livestock raised by other households, family sustenance and entrepreneurial activities are considered as family expenditures. Gifts, support, assistance or relief in goods and services received by the family from friends, relatives, and others, are also included as part of family expenditure.

They exclude all expenses in relation to farm or business operations, investment ventures, purchase of real property, and other disbursements which do not involve personal consumption.

Family income - total family income includes primary income and receipts from other sources received by all family members during January to June 2016, as participants in any economic activity or as recipients of transfers, pensions or grants. Primary income includes: salaries and wages, commissions, tips, bonuses, family and clothing allowances, transportation and representation allowances, honoraria, and other forms of compensation; and net receipts derived from the operation of family-operated enterprises or activities, and practice of a profession or trade.

Income from other sources include: imputed rental values of owner-occupied dwelling units, interest, rentals including landowner's share of agricultural products, pensions, support, and value of food and non-food items received as gifts by the family (as well as the imputed value of services rendered free of charge to the family). Also included as part of family income are receipts from family sustenance activities which are not considered as family-operated enterprise.

Proportion of families with access to safe water supply – The ratio of the number of families who access water from community water system (piped into their dwelling, yard/plot or public tap) and protected wells to the total number of families.

Proportion of families with sanitary toilet – The ratio of the number of families with flush toilet (either owned or shared) and close pit to the total number of families.

Proportion of families with owned or owner-like possession of housing units –

The ratio of the number of families with housing unit owned or amortized to the total number of families.

Proportion of families with houses made of strong materials – The ratio of the number of families with houses having roofs and outer walls made of strong materials such as galvanized iron/aluminum, tile, concrete, bricks stone and asbestos to the total number of families.

Proportion of families with gainfully employed family head – The ratio of the number of families with a family head who is gainfully employed to the total number of families.

Proportion of families with gainfully employed members 18 years old and over

– The ratio of the number of families with gainfully employed members 18 years old and over to the total number of families with members 18 years old and over.

Proportion of families with children 6-11 years old in elementary

– The ratio of the number of families with children 6-11 years old attending Grade I to Grade VI to the total number of families with children 6-11 years old.

Proportion of families with children 12-15 years old in high school

– The ratio of the number of families with children 12-15 years old attending Grade VII to Grade X to the total number of families with children 12-15 years old.

Proportion of families with members 5-17 years old who are working

– The ratio of the number of families with children 5-17 years old who are working to the total number of families with children 5-17 years old.

HIGHLIGHTS OF THE APIS 2016 RESULTS

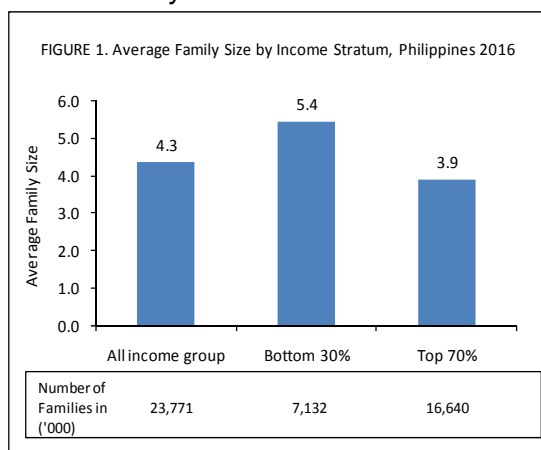

Results of the survey are presented in this report using the Bottom 30% and Top 70% income strata. These strata were formed according to families per capita income arranged from highest to lowest, wherein the first stratum is composed of families whose income fall or at the bottom 30% while the second group comprised of families belonging to the top 70% of the income bracket.

A. FAMILY SIZE AND CHARACTERISTICS OF FAMILY HEAD

Information on the family size and characteristics of the family head can provide information about the economic status of a family.

A.1 Average Family Size

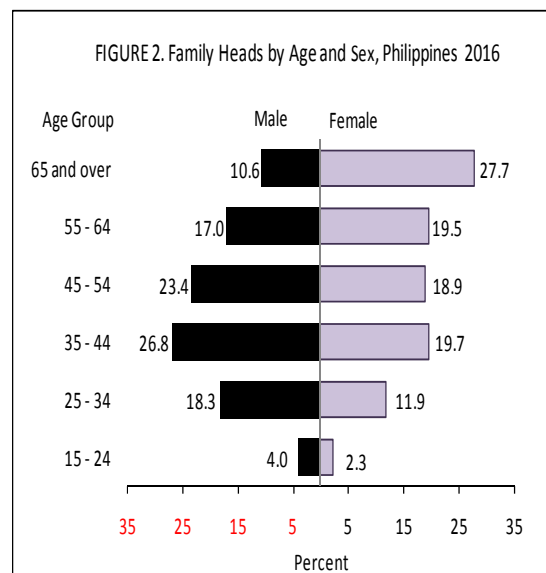

As of July 2016, the estimated number of families was 23.7 million with an average family size of 4.3 persons. Of the total families, 7.1 million belong to the Bottom 30% stratum and 16.6 million in the Top 70% stratum. The average family size of those in the Bottom 30% stratum tend to be higher (5.4) than the Top 70% group (3.9) [Figure 1].

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

A.2 Age and Sex of Family Head

In the Philippines, there were more families headed by males than females. The survey showed that 79.1 percent of the total families were headed by males and the remaining 20.9 percent were headed by females. The survey showed that female family heads were generally older than their male counterparts. About 47.2 percent of the female family heads were aged 55 years or over compared with 27.6 percent among the male heads. Results also showed that heads of families in the Bottom 30% tend to be younger than heads of families of the Top 70% stratum. About 25.3 percent of family heads in the Bottom 30% group were aged 55 or over while 34.3 percent in the same age group among the Top 70% stratum.

A.3 Educational Attainment of Family Head

Around one in every four (26.8%) family heads had at least completed high school education. Specifically, about 13.4 percent attended/finished post secondary education or reached college but did not finish it, and 11.1 percent completed college or higher level of education.

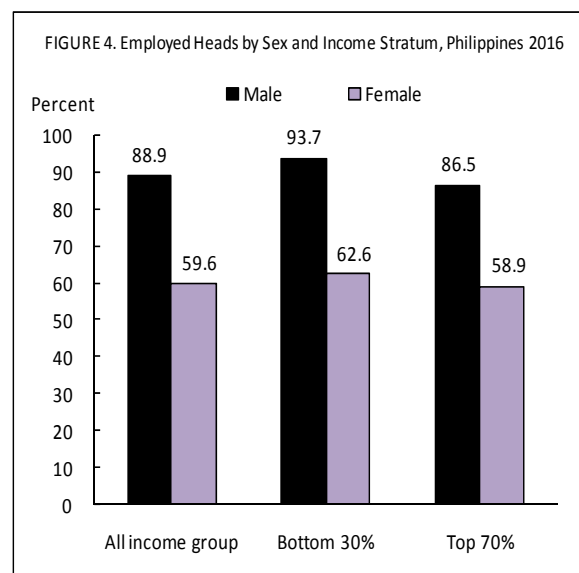

The survey showed that a higher proportion of female heads (26.2%) had at least reached college level compared to their male (18.4%) counterpart. Only around one in every 10 male heads (9.6%) were college graduate or higher vis-à-vis the 16.4 percent among female heads. Heads of families belonging to the Bottom 30% income stratum tend to attain lower level of education than the family heads among the Top 70% group. About 4.7 percent of family heads in the Bottom 30% had at least college education compared with 26.6 percent in the Top 70% group (Table 1).

A.4 Employment of Family Head

In 2016, eight out of 10 (82.8 %) family heads were employed or had a job or business at anytime from January 1 to June 30, 2016 (Table 1). Male heads who were employed comprised 88.9 percent of all income groups. The corresponding proportion among female heads is lower at 59.6 percent.

The proportion of families with heads who had job or business was higher for the Bottom 30% stratum (89.8%) compared with that for the Top 70% income stratum (79.8%) [Table 1].

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

B. HOUSING CHARACTERISTICS

The data on family's housing characteristics can indicate the health and economic well being of families. In the APIS 2016, the tenure status of housing unit and lot, the floor area of housing unit, type of building or house and the construction materials of the roof and outer walls of the building were asked. Questions on the presence of electricity, main source of water supply, type of toilet facility used by the family were also included.

B.1 Tenure Status of Housing Unit and Lot

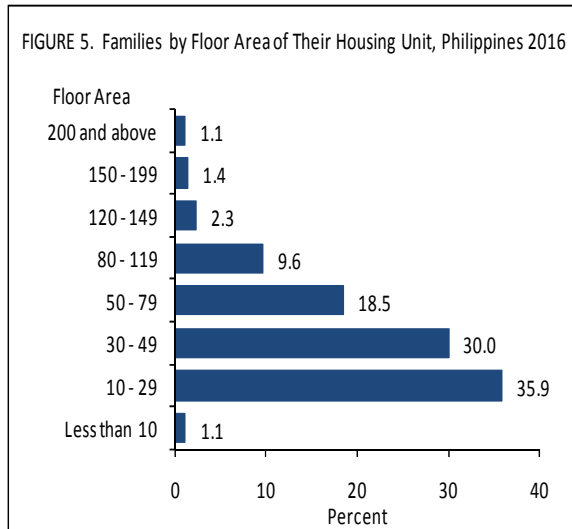

In 2016 nearly 6 in 10 families (61.0%) own the house and lot they occupied. The remaining 39 percent occupied houses and lots under the following tenure: own house, rent-free lot with consent of owner (17.3%), rent house/room including lot (10.1%), rent-free house and lot with consent of owner (7.2%), own house, rent-free lot without consent of owner (2.3%), own house, rent lot (1.4%), or rent-free house and lot without consent of owner (less than one percent). Among families in the Bottom 30% stratum, 53.7 percent owned their house and lot, while 64.2 percent among families in the Top 70% group.

Table 2. Families by Tenure Status of the Housing Unit and Lot They Occupy by Income Stratum, Philippines 2016			
Tenure Status of the Housing Unit and Lot	Income Stratum		
	All income group	Bottom 30%	Top 70%
Number of Families (Total, in thousands)	23,771	7,132	16,640
Total	100	100	100
Own house and lot or owner-like possession of house and lot	61.0	53.7	64.2
Rent house/ room including lot	10.1	3.3	13.0

B.2 Floor Area of Housing Unit

It shows that one in every three families (32.9%) was residing in housing units with floor area of at least 50 square meters (sq.m.). Families residing in housing units with a floor area ranging from 30 to 49 sq.m. comprised 30.0 percent; those living in housing units with a floor area of 10 to 29 sq.m. at 35.9 percent; and those residing in housing units with floor area of less than 10 sq.m. at 1.1 percent.

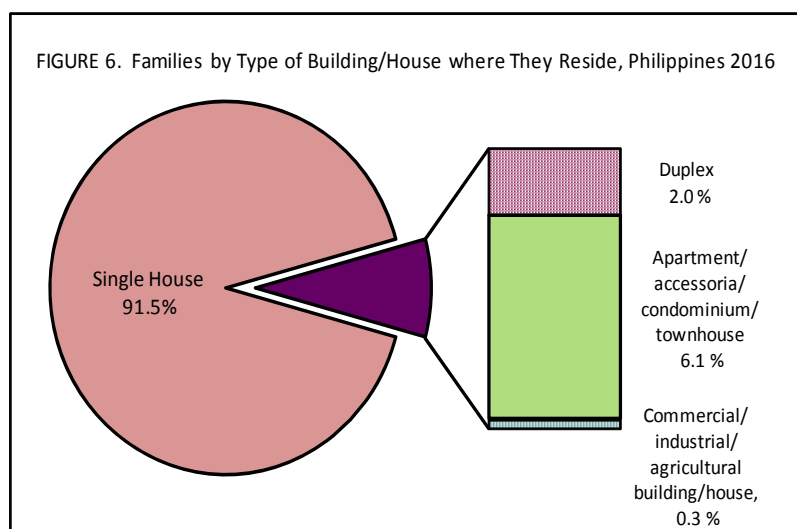

Most of the families (52.9%) in the Bottom 30% occupied housing units with floor area ranging from 10 to 29 sq.m., followed by families who occupied housing units with floor area ranging from 30 to 49 sq.m. (27.0%). About 2 in 10 families belonging to the Bottom 30% stratum resided in housing unit with floor area of at least 50 sq.m.. In contrast, 4 in 10 families among the Top 70% group were residing in similar floor area (Table 3).

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

B.3 Type of Building/House

Ninety-two percent of Filipino families were residing in single houses (Table 4). The rest dwelt in apartments, accessoria, condominiums or townhouses (6.1%), duplex houses (2.0%), or commercial, industrial, agricultural buildings or houses (less than one percent).

B.4 Construction Materials of the Roof and Outer Walls

Most of the roofs and a great majority of the outer walls of houses in the Philippines were made of strong materials. Strong materials refer to galvanized iron or aluminum, tile, concrete, brick stone, while light materials refer to cogon, nipa or

anahaw. About 84.3 percent of families had houses with strong roofs and 69.1 percent had strong outer walls (Tables 5 and 6).

As expected, a larger proportion of the Top 70% group of families had housing units made of strong roofs (90.6%) and outer walls (79.6%) compared to the Bottom 30% families (69.6% and 44.6%, respectively). One in every five families in Bottom 30% group of families were living in a house with roof made of light materials (24.3%), and almost four in every 10 families (36.7%) were living in houses with outer walls made of light materials.

B.5 Electricity

Almost all families have electricity in their homes. About 91.4 percent of families in the country have electricity in their homes, on the other hand, very few families does not have electricity. Four-fifth of families (79.8%) in the Bottom 30% stratum had electricity in their homes (Table 7).

B.6 Main Source of Water Supply

The data on main source of water supply provide information on the proportion of families with access to safe water supply. Considered as clean and safe sources of water supply are community water system (which may be piped into dwellings or into yards or piped into public taps), and protected well.

About 83.2 percent of the total families had access to a safe source of water supply (Table 7). The remaining 16.8 percent of families obtained their water from sources considered unsafe, such as unprotected well (5.3%), developed spring (4.4%),

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

undeveloped spring (3.2%), river, stream, pond, lake or dam and rainwater (less than one percent), and tanker truck or peddler or neighbor (3.2 %). Seven out of 10 families in the Bottom 30% stratum had access to safe source of water supply compared to nine in every 10 in the Top 70% group of families.

Note: Considered as safe sources of water supply are community water system and protected well.
Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

B.7 Toilet Facility

Data about the toilet facility used by the family provide indicators of health and sanitation status of families. One of its indicators is the proportion of families who used a sanitary toilet. For this survey, sanitary toilet refers to flush toilet (either owned or shared) and close pit type of facility.

At the national level, the proportion of Filipino families with sanitary toilets was 91.9 percent (Table 8). Other families used open pit (2.7%), drop or overhang and pail system (less than one percent) which were considered as unsanitary. There were 4.2 percent or about one million families with no toilet facilities in their homes.

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

Families in the Bottom 30% group were more likely to use unsanitary toilet. Among families in the Bottom 30% group, 19.3 percent used unsanitary toilet while 3.2 percent among families in the Top 70% stratum.

Table 8. Families by Type of Toilet Facility They Use by Income Stratum, Philippines 2016			
Type of Toilet Facility	Income Stratum		
	All income group	Bottom 30%	Top 70%
Number of Families (Total, in thousands)	23,771	7,132	16,640

B.8 Household Conveniences

Data on ownership of family conveniences provide proxy indicators of the economic status of the family. Cellular phone was the most common (84.8%) household appliance in Filipino homes, followed by television (73.8%) [Table 9].

As expected, families in the Top 70% stratum tend to own household appliances than the Bottom 30% families. Among the Top 70% families, 89.3 percent of families had at least one cellular phone while 74.4 percent among the Bottom 30% group of families.

C. EDUCATION

C.1 Highest Grade Completed of Population 5 Years and Over

Low level of education is associated with poverty. Members of families in the Top 70% families tend to have attained higher level of education than members of families belonging to Bottom 30% group. Persons who had attained a college level or a higher level of education comprised 26.3 percent among Top 70% families compared to 5.3 percent among Bottom 30% families. Those who were high school graduates in Top 70% group of families comprised 22.6 percent, while 15.6 percent of families in the Bottom 30% group (Table 10).

C.2 Attendance in School of Persons 3 to 24 Years Old

In this survey, persons who were enrolled in the school year covering June 2016 to March 2017 were considered as attending school. School refers to formal schools, including vocational/technical schools offering post-secondary courses. Information on attendance in school of family members 3 to 5 years old was included to capture early childhood educational learning in schools like nursery, kindergarten and preparatory schools.

Of the estimated 46.1 million population 3 to 24 years old in 2016, around two-thirds (65.3%) were enrolled or attending school during school year 2016-2017 (Table 11). School attendance among members 3 to 24 years old of families in the Bottom 30% was 65.1 percent and 65.5 percent in the Top 70% families. By sex, of the total females of this specified age group, 65.7 percent attended school while 65 percent among males.

Of the total number of persons aged 3 to 24 years who were attending school, 28.4 percent, were children aged 6 to 9 years. Those in age group 10 to 12 years comprised 20.8 percent, and those aged 13 to 16 years, 25.5 percent.

Persons of school age in families belonging to the Top 70% were more likely to pursue higher education than those in the Bottom 30% population. While 15.2 percent of the school age populations in the Top 70% families were attending college or post graduate schools, the corresponding proportion in the Bottom 30% population was 4.1 percent (Table 12). The proportion of those attending Grade I to Grade VI was higher among the persons of school age in the Bottom 30% population compared to Top 70% population with 54.3 percent and 40.6 percent, respectively.

C.3 Reasons for not Attending School

There were more than 12 million aged 6 to 24 years who were not attending school in school year 2016-2017 (Table 13).

The most common reasons for not attending school were marriage or family matters (25.9%), employment or looking for work (25.8%), high cost of education or financial concern (16.4%), and lack of personal interest (15.3%). These were also the most common reasons reported by members of families who were not attending school in the Bottom 30% population: marriage or family matters (31.1%), high cost of education or financial concern (21.4%), lack of personal interest (20.7%), and employment or looking for work (17.1%). Among the Top 70% population, reasons were employment or looking for work (31.8%), marriage or family matters (22.2%), finished schooling or finished post secondary or college (18.4%), and high cost of education or financial concern (12.9%).

Among the male population aged 6 to 24 years, employment or looking for work (30.8%), lack of personal interest (22.2%), high cost of education or financial concerns (19.3%), and marriage or family matters (14.7%) were the top reasons why they were not attending school. A slightly different pattern was observed among females in the same age group, namely: marriage or family matters (37.8%), employment or looking for work (20.5%), finished schooling or finished post secondary or college (16.7%), and high cost of education or financial concerns (13.2%) were the reasons why they were not attending schools.

C.4 Children in Grade I to Grade VI

A total of 9.8 million families with children aged 6 to 11 years were recorded in the survey. Of this number, 9.5 million or 96.4 percent had children who were enrolled in Grade I to Grade VI (Table 14). The proportion of families with children aged 6 to 11 years who were enrolled in Grade I to Grade VI in SY 2016-2017 was nearly similar for the Bottom 30% families and the Top 70% families with 96.5% and 96.4% respectively.

Table 14. Families with Children Aged 6 to 11 Years in Grade I to VI (K12 Program) by Income Stratum, Philippines 2016

C.5 Children in Junior High School (Grade VII to Grade X)

Of the 7.0 million families with children aged 12 to 15 years, 81.4 percent or about 6.0 million families were reported having children in this age bracket who were in Grade VII to Grade X (Table 15). Among families with children aged 12 to 15 years in the Top 70% income stratum, 87.7 percent were enrolled in junior high school; the corresponding percentage in the Bottom 30% income stratum is 73.1 percent.

Table 15. Families with Children Aged 12 to 15 Years in Junior High School Education (Grade VII to X) (K12 Program) by Income Stratum, Philippines 2016

D. ECONOMIC CHARACTERISTICS

D.1 Families with Working Members 18 Years Old and Over

In the 2016 APIS, a family member was considered employed if he or she had worked or had a job or business at anytime during the reference semester, that is, from January 1 to June 30, 2016. A work is defined as any economic activity that a person does for pay, profit or without pay on family farm or enterprise, or an activity done by a farm operator or member of his/her family on another's farm on "exchange labor" arrangement.

Of the total 23.8 million families with at least one member aged 18 years and over, 92.4 percent or 22.0 million were employed during the reference semester (Table 16). Percentage of Families with members aged 18 years and over who were employed was higher in the Bottom 30% group of families (95.5%) compared to Top 70% families (91.2%).

Table 16. Families with Members Aged 18 Years or Over Who are Employed by Income Stratum, Philippines 2016			
Income Stratum	Number of Families with Members aged 18 Years or Over (in thousands)	Families with Members aged 18 Years or Over Employed	
		Number (in thousands)	Percent
All income group	23,752	21,957	92.4
Bottom 30%	7,130	6,805	95.5
Top 70%	16,622	15,151	91.2

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

D.2 Families with Working Children 5-17 Years Old

The Labor Code of the Philippines specifies that no child below 18 years old shall be employed except when he/she works directly under the sole responsibility of his parents/guardian and his/her employment does not in any way interfere with his/her schooling. Although the survey results would not show whether the conditions stated above are met, results would show the proportion or number of families with children aged below 18 years who are working.

Of the 14.9 million families with members aged 5 to 17 years, 9.0 percent or about 1.3 million families were reported to have working children (Table 17). Among the Bottom 30% families with members aged 5 to 17 years, 14.2 percent had working children while 5.8 percent had working children among the Top 70% families.

Table 17. Families with Members aged 5 to 17 Years Who are Employed by Income Stratum, Philippines 2016

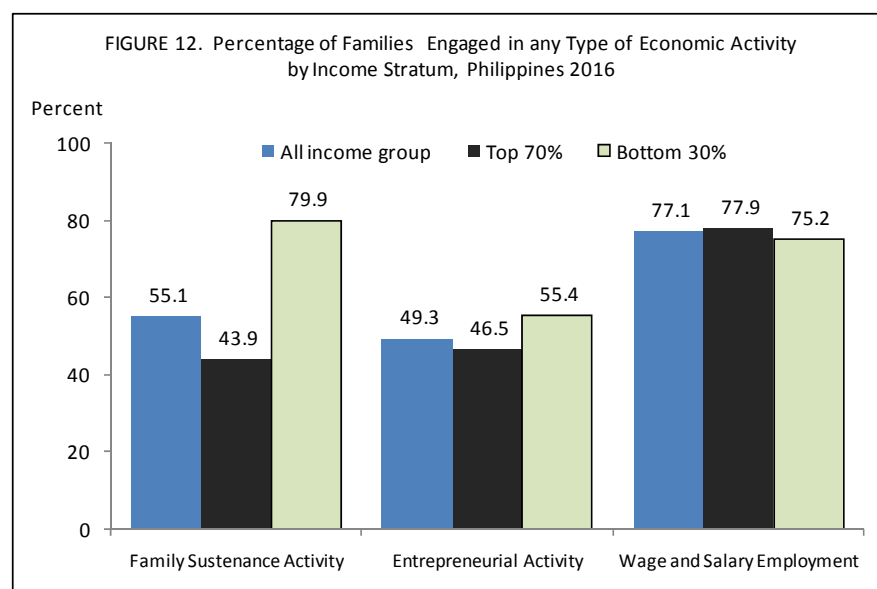

Income Stratum	Number of Families with Members aged 5 - 17 Years (in thousands)	Families with Members aged 5 - 17 Years who are Gainfully Employed	
		Number (in thousands)	Percent
All income group	14,859	1,339	9.0
Bottom 30%	5,720	811	14.2
Top 70%	9,140	528	5.8

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

D.3 Families Engaged in Any Economic Activity

The three major economic activities that contribute to a family's income are: 1) wage and salary, 2) family sustenance activities, and 3) entrepreneurial activities. Other sources of income include net share of crops, cash receipts both from abroad and domestic source, rentals from non-agricultural lands, interest, pension and retirement, workmen's compensation, social security benefits and dividends from investment.

In 2016, the number of families with at least one member reported to have engaged in any type of economic activity in the six months preceding the survey was estimated at 22.8 million or 96.0 percent of total families (Table 18). Wage and salary workers accounted for 77.1 percent of such families; those engaged in entrepreneurial activity, 49.3 percent; and those engaged in family sustenance activity, 55.1 percent. For this report, more than one economic activity can be reported for one family.

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey

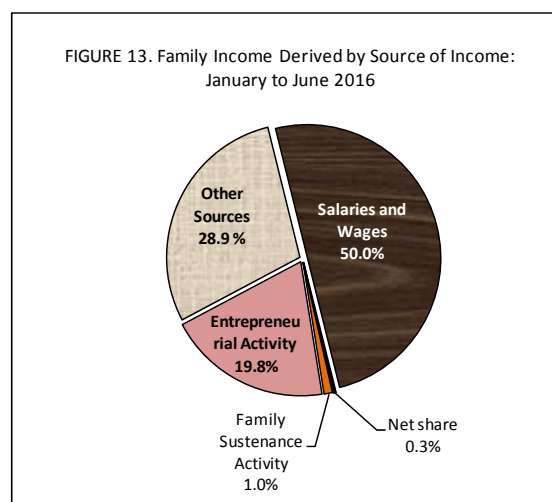

Table 18. Families Engaged in Any Economic Activity by Income Stratum, Philippines 2016			
Type of Economic Activities	Income Stratum		
	All income group	Bottom 30%	Top 70%
Number of Families with Members Engaged in Economic Activity (Total, in thousands)	22,814	7,061	15,753
Family Sustenance Activity	55.1	79.9	43.9
Entrepreneurial Activity	49.3	55.4	46.5
Wage and Salary Employment	77.1	75.2	77.9
Note: Percentage do not add up to multiple reporting.			
Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey			

Among the Bottom 30% families engaged in an economic activity in the six months prior to the survey, 79.9 percent were involved in family sustenance activities and 55.4 percent in entrepreneurial activities. Families with wage and salary earning members comprised 75.2 percent. Meanwhile, among the Top 70% group, the largest proportion of families with members engaged in an economic activity were those with members who were salary and wage earners (77.9%) [Table 18].

E. FAMILY INCOME AND EXPENDITURE

E.1 Total Family Income

In the 2016 APIS, family income includes, salaries and wages from jobs or businesses, incomes derived from entrepreneurial activities, net share of crops, fruits and vegetables produced, aquaculture products harvested or livestock and poultry raised by other households and from other sources such cash receipts, gifts, support, relief and other forms of assistance from abroad and from domestic source, rentals received from non-agricultural lands, buildings, space and other properties, interest, pension and retirement, workmen's compensation and social security benefits, and dividends from investment

Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey			

The total family income for the period January to June 2016 reached Php 2.9 trillion (Table 20). Almost 87.0 percent of this income or Php 2.6 trillion was earned by the Top 70% families. The largest percentage (50.0%) of total family income was from salaries and wages. Income from entrepreneurial activities accounted for 19.8 percent of the total family income. About 28.9 percent of the total family income was derived from other sources.

Table 20. Total Family Income Derived by Source of Income by Income Stratum, Philippines January 1 to June 30, 2016			
Source of Income	Income Stratum

Note: * Include cash receipts, gifts, support, relief and other forms of assistance from abroad and from domestic source, rentals received from non-agricultural lands, buildings, space and other properties, interest, pension and retirement, workmen's compensation and social security benefits, and dividends from investment.			
Source: Philippine Statistics Authority, 2016 Annual Poverty Indicators Survey			

Almost three-fourths of the Php 384 billion earned by families in the Bottom 30% were contributed by wage and salary workers (47.7%), those with entrepreneurial activities (24.5%), and those with family sustenance activities (4.1%). Fifty percent of the total income of the Top 70% families came from salaries and wages while 19.1 percent was from entrepreneurial activities and 29.8 percent from other sources.

The average family income for the six months prior to the survey, computed by dividing the total income for the period by the total number of families, amounted to Php 124,000 (Table 22). The average family income for the Bottom 30% families was Php 54,000 while Php 154,000 for the Top 70% families.

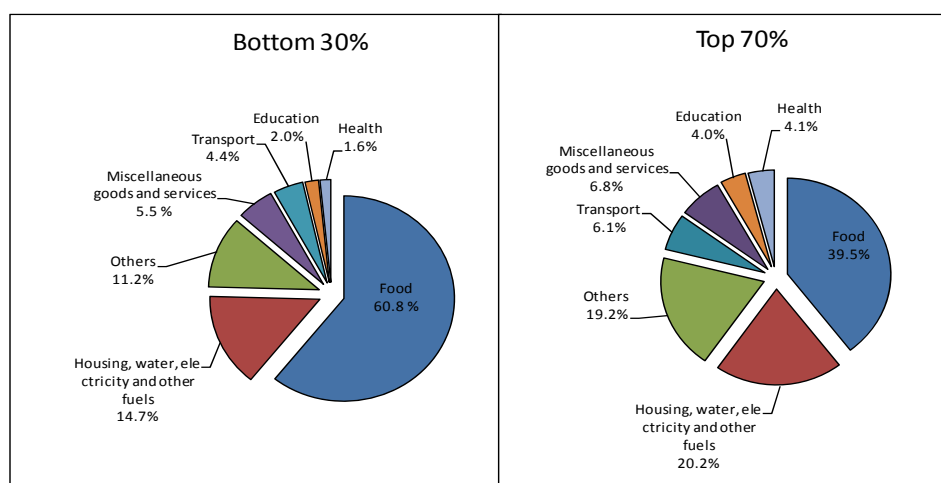

E.2 Family Expenditure and Saving

Family expenditures refer to the expenses or disbursements made by the family purely for personal consumption. It includes expenditures for food, housing, electricity, water, and other fuels, transportation, household and personal care, clothing and footwear, education, recreation, medicines, and others.

Total family expenditure from January 1 to June 30, 2016 amounted to Php 2.4 trillion (Table 21). Two-thirds (65.8%) of the total expenditure accounted on food (42.7%), housing, water, electricity, and other fuels (19.3%), and education (3.7%). Eighty-five percent of the total family expenditure was contributed by families belonging to Top 70% while 15 percent by the Bottom 30% families. Food was the highest proportion of expenditure among Bottom 30% families with 60.8 percent of their total expenditure, or nearly twice the proportion of expenditures on food of the families belonging to Top 70% families (39.5%).

The total family savings or the total income minus the expenditure, for the same period was estimated at Php 530 billion. Top 70% families had a saving of Php 510 billion while the Bottom 30% families had a saving of Php 19 billion. The average family expenditure was Php 102,000, Php 51,000 for the Bottom 30% group of families and Php 123,000 for the Top 70% families (Table 22).

E.3 Average Per Capita Income and Average Per Capita Expenditure

Average per capita income is computed by dividing the total income for the reference period by the total population. Likewise, average per capita expenditure is the total expenditure divided by total population.

The national average per capita income for the period January 1 to June 30, 2016 was about Php 29,000 (Table 22). The average per capita income for the Bottom 30% families was about Php 10,000 while Php 40,000 for the Top 70% group of families. On the other hand, the average per capita expenditure at the national level was Php 23,000 while Php 9,000 for the Bottom 30% group of families and Php 32,000 for Top 70% families.

F. OTHER RELEVANT INFORMATION

F.1 Hunger

In 2016, of the estimated 23.7 million families nationwide, 2.4 percent of the total families experienced hunger in the three months prior to the survey (Table 25). Of the families who experienced hunger, 21.8 percent experienced it at least once in each week during the reference period, 53.9 percent experienced it at least once in each month, and 24.3 percent experienced it at least once in three months. Among families in the Bottom 30% group, 5.6 percent experienced hunger and 1.0 percent of families among those in the Top 70% group experienced it.

F.2 Availment of Loan

Of the total families, 21.8 percent or 5.2 million families had members who availed of loans in the six months prior to the survey in any lending institution or private individual whose business is lending money with interest (Table 26 and 27). The three most common sources of loans were from relatives/friends (38.3%), microfinance institution (34.4%) and informal lenders (10.4%) [Table 27].

Table 26. Percentage of Families Who Availed of Loan From January to June 2016 by Income Stratum, Philippines 2016

Income Stratum	Total Number of Families (in thousands)	Number of Families Who Availed Loan (in thousands)	Percent of Families Who Availed Loan
All income group	23,771	5,174	21.8
Bottom 30%	7,132	2,004	28.1
Top 70%	16,640	3,169	19.0

Note: Percentages do not add up to 100 due to a family can avail loan from more than one source.
