3 ☒ **REMARKS**

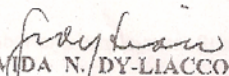

The following are the comments/suggestions of the NSCB Technical Staff on the survey

1. We reiterate our previous suggestion to disaggregate by sex the items in employment. If not, please indicate the reason/s for not doing so.
2. We also reiterate the previous request to submit final documents for the Questionnaire and Enumeration Manual.
3. On page 2 of SSRCS Form 1, number 1, please provide explanation why the expected response rate decreased to 70%, as compared to 80% in the 2006 OWS?
4. On page 3 of SSRCS Form 1, number 12c, please provide explanation why the number of employees of sample non-agricultural establishment decreased to 20 and over, from 50 and over in the 2006 OWS.
5. On page 3 of SSRCS Form 1, number 12h and 12i, the estimation procedure assumes that characteristics of non-responding establishments are not significantly different from responding establishments. We suggest that the possible reasons why the non-responding establishments are not submitting the questionnaires be looked into, and therefore establish possible bias in the estimates.
