1/ area harvested for temporary crops;

% Change = (total this year/total last year) - x 100

Provincial % change by crop: (wt_{sf} x % change) + (wt_p x % change)

Where: wt_{sf} - weight of small farms wt_p - weight of plantation farms

Provincial estimate by crop: (Last year final estimate) x (provincial current % change)

area planted for permanent crops

< compute separately for: 1) small farms and 2) plantations
