## Data Processing & Appraisal

### Data Editing

Data Editing is done in several stages as follows:

1. Upon receipt of the monthly regional reports, the designated personnel checks the completeness and consistency of data. In case of doubtful entries, he/she contacts the regional office/s for clarification and makes corresponding correction, if there are any. For National Capital Region, termination reports involving 100 or more workers are being further verified thru phone.
2. The main economic activity or service provided by the establishment should be written in a more detailed description, e.g., softdrinks manufacturing, commercial banking, etc.
3. Each report should have appropriate codes such as Philippine Standard Geographic Code, Philippine Standard Industrial Classification Code and codes for termination, status, reasons and duration.
4. The addresses of establishments should be in conformance with the "Guidelines on Naming and Addressing of Establishment".
5. Editing of Philippine Standard Industrial Classification Code and duplication of reports are also being done thru computer software using SPSS program.

Note: Refer to Job Displacement Monitoring System (JDMS) Manual of Operations.

### Other Processing

Other Processing

Upon receipt of reports, the following steps are done:

1. Office editing and coding
2. Data entry in excel format and then copy paste to SPSS
3. Checking of completeness of reports using SPSS
4. Verification of termination report with large number of displaced workers (NCR only)
5. Generation of Listing of Establishments
6. Validation/deletion of duplicate reports
7. Preparation of statistical tables
8. Back up database annually

Note: Refer to Data Entry and Generation of Statistical Tables/List of Generation and Maintenance of Databases.

### Estimates of Sampling Error

### Other Forms of Data Appraisal

Generated statistical tables are emailed to regional offices for validation after which will be emailed back to BLES for the preparation of final tables.
