Overview

Identification

ID NUMBER
DDI-PHL-BAS-SADP-2009-v1.0

Version

VERSION DESCRIPTION
V1.0 - is the municipal level data edited at the provincial level, not anonymized, for internal use.

PRODUCTION DATE
2009-12-01

Overview

ABSTRACT
The SADP is an establishment-based survey, hence it excludes animals slaughtered outside slaughter facility or structure. It covers four (4) major livestock commodities (carabao, cattle, swine and goat), and only broilers for chicken. It is being conducted in all provinces nationwide with data obtained from a complete enumeration of accredited abattoirs and dressing plants as well as LGU-supervised slaughter facilities. The collection of slaughter data from accredited abattoirs and dressing plants is being undertaken in collaboration with the National Meat Inspection Service (NMIS).

KIND OF DATA
Administrative records data [adm]

UNITS OF ANALYSIS
Abattoirs and Dressing Plants

Scope

NOTES
The SADP covers four (4) major livestock commodities i.e., carabao, cattle, swine and goat; and only broiler for chicken. It is being conducted in all provinces including NCR with data obtained from a complete enumeration of accredited abattoirs and dressing plants as well as non-accredited or LGU-supervised slaughter facilities.

Sampling

Sampling Procedure

The frame was based on the complete list of accredited abattoirs and dressing plants provided by NMIS and the complete list of LGU-supervised abattoirs and dressing areas with slaughter facility or structure. A complete enumeration of abattoirs and dressing plants is being done.

Questionnaires

Overview

A common survey instrument is being used by BAS and NMIS.

Data Collection

Data Collection Dates

Start	End	Cycle
2009	2009	N/A

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The NMIS Meat Inspectors stationed at the accredited abattoirs and dressing plants record slaughter data either by using the prescribed BAS-NMIS common slaughter form or using a logbook. Likewise, LGU Meat Inspectors, Market Administrators, Provincial/City Veterinarians assigned in the LGU-supervised abattoirs either accomplish the BAS-NMIS common slaughter form or record data using a logbook. BAS in turn collects the duplicate BAS-NMIS common slaughter form or copy the data from the logbook from both NMIS and LGU.

Questionnaires

A common survey instrument is being used by BAS and NMIS.

Data Collectors

Name	Abbreviation	Affiliation
Bureau of Agricultural Statistics	BAS	Department of Agriculture (DA)

Supervision

The BAS Provincial Agricultural Statistics Officer (PASO) supervises the data collection in the province. NMIS Officer also supervises the data collection by province.

Data Processing

Data Editing

Manual editing:

The BAS consolidates data coming from the accredited and non-accredited abattoirs and dressing plants. The BAS reviews and verifies by looking at the available time series data. NMIS is being consulted for any abrupt changes from the previous reference quarter and ask for possible reasons for the changes.

The PASO supervises the consolidation and review of slaughter data in the province. The BAS Regional Agricultural Statistics Officer (RASO) supervises the consolidation, review, and analysis of slaughter data in all provinces within the region.

Other Processing

Electronic Processing:

The Provincial Processing Officer (PPO) of BAS is responsible in encoding the outputs from accredited and non-accredited abattoirs and dressing plants using Microsoft Excel. The PASO supervises the electronic processing of slaughter data in the province. The Regional Agricultural Statistical Officer (RASO) supervises the electronic data processing of slaughter data of all provinces in the region to come up with the regional estimates.
