

FOREWORD

The **2017 Commodity Flow in the Philippines** is an annual publication of the Philippine Statistics Authority (PSA) that provides data on the quantity and value of regional commodity flow by mode of transport, and by port of origin and destination. This publication also includes data on the number of passengers by province and region.

Data on the inflow and outflow of commodities in the different regions serve as basis in the formulation and implementation of the various regional development programs like countryside development and port planning.

The PSA acknowledges with sincere thanks and appreciation the unwavering support and valuable assistance extended by the Philippine Airlines, the Philippine Ports Authority, and the various shipping companies in providing the source documents needed in compiling domestic trade statistics.
