Overview

ABSTRACT
The LTS aims to provide quarterly trend statistics on labor turnover and existing job vacancies as indicators of labor market activity and general business situation of the country.

This provides the government and the private sector a complete picture of labor demand and job turnover as inputs to decision making and policy formulation.

Coverage

GEOGRAPHIC COVERAGE
National Capital Region

NCR 1 - Manila, San Juan, and Mandaluyong

NCR II - Marikina and Quezon City

NCR III - Makati, Taguig, Pasig and Pateros

NCR IV - Caloocan, Malabon,, Navotas and Valenzuela

NCR V - Pasay, Parañaque, Las Piñas and Muntinlupa

UNIVERSE
The establishment sampling frame for the 2021 Labor Turnover Survey was extracted from the preliminary 2020 List of Establishments (LE) as of 31 December 2020.

This list was a product of the 2020 Updating of List of Establishments (ULE). The updating involved complete enumeration of establishments in the barangays where "no matched" establishments (establishments listed in other sources but not in the LE from prioritized secondary sources are located, barangays with new malls, barangays having establishments with total employment of 10 and over, and barangays with the highest number of establishments for some provinces. Also covered using mail inquiry, were other "no matched" establishments including those located in distant barangays.

Other sources of updates are the feedbacks from different establishment-based surveys such as Annual Survey of Philippine Business and Industry ASPBI and LTS.

A total of 15,020 establishments in NCR with employment size of at least 20 workers extracted from the 2019 LE in the country comprised the LTS 2021 sampling frame.

Sampling

Sampling Procedure

The establishment is the unit of enumeration. There are 15,020 establishments in NCR included in the updated LE used as sampling frame for LTS 2021. These establishments were stratified based on the eighteen (18) sections as domains.

The initial sample size per stratum was obtained by taking into account the computed highest Coefficient of Variation (CVh) between the estimates on accession and separation rates from the result of the 4th Quarter 2020 LTS and a target CVh. For manageability and budget considerations, target CV of 9% was used.

Note: Refer to Metadata and Field Operations Manual in Technical Documents.

Response Rate

1st Qtr - 82.25%
2nd Qtr - 85.00 %
3rd Qtr - 85.40 %
4th Qtr - 83.60 %

Weighting

Weights were computed as the ratio of the estimated population of establishments to the number of responding establishments.

Wi = Ni/ni x ni"/n

Where
Wi - Weight in the ith industry stratum
Ni - Total number of establishments in the frame ith industry stratum
ni - Number of sample establishments in the ith industry stratum
n' - Number of responding establishments in the ith industry stratum
n'' - Number of eligible units in the ith industry stratum

Data Collection Notes

The conduct of training on data collection, field editing and machine processing aims to ensure that statistical and survey standards are observed. Three levels of training were conducted for field personnel before the start of the field operation.

The joint Task Force (1st Level) and 2nd Level Training on Field Operations was a two day on-line training conducted on 17-18 August 2021. Field operation procedures, technical and administrative aspects was discussed extensively. The participants were the Regional Director, Statistical Operations and Coordination Division (SOCD) Chief, all Chief Statistical Specialist/OIC (CSS) and Provincial Supervisor (PS) for LTS of POs and two (2) technical staff of the RSSO who will be involved in the implementation of the survey. Lecturers/resource persons are staff from the EDSD.

At the 3rd Level Training, the Provincial Supervisor who participated in the Task Force Training trained the hired Statistical Researchers (SRs) and the Assistant to the Provincial Supervisors (APS) prior to the start of field operations. This was conducted for two days within the last week of August 2021 in the POs.

Meanwhile, TFT on Machine Processing was conducted on September 2021 with staff of SDD and SQAD of ITDS to serve as lecturers.

Supervision

The personnel from the PSA Field Offices supervised the data collectors/statistical researchers in their respective field offices. In provinces/areas where there were relatively many establishments to be covered, area supervisors were hired to assist the survey researchers/encoders in the supervision of data collection activities as well as the manual and machine processing.
