VERSION DESCRIPTION
V2.0: Edited data, anonymous dataset for public distribution.

PRODUCTION DATE
2023-09-29

Overview

ABSTRACT

The Philippine Statistics Authority (PSA) was created by virtue of the Republic Act No. 10625 (R.A. 10625) which paved the way for the merging of the four (4) major statistical agencies namely: National Statistics Office (NSO), National Statistical Coordination Board (NSCB), Bureau of Agricultural Statistics (BAS), and Bureau of Labor and Employment Statistics (BLES). It is engaged in the primary data collection and compilation of secondary data. Hence, became the sole agency to compile the foreign trade statistics in the country.

The PSA serves as the central statistical authority of the government that compiles and generates International Merchandise Trade Statistics (IMTS) or commonly known as Foreign Trade Statistics. FTS is one of the designated statistics released by PSA, which was approved under Executive Order No. 352 - Designation of Statistical Activities That Will Generate Critical Data for Decision Making of the Government and the Private Sector.

The Philippines adopted the "General" trade system of recording foreign trade statistics. The customs frontier (not the national boundary) was used as the statistical frontier. Under this system, all goods entering any of the seaports or airports of entry of the Philippines properly cleared through customs or under customs control are considered imports, whether the goods are for direct consumption, for merchandising, for warehousing or further processing. On the other hand, all goods leaving the country, which are properly cleared through the Customs, are considered exports. However, a distinction was made between export for goods grown, mined or manufactured in the Philippines (domestic exports) and exports of imported goods that did not undergo physical and/or chemical transformation in the Philippines (re-exports).

The collected data on import and export documents will generate economic statistics needed to guide both government and the private sectors in policy making, business planning and development. The main uses are as inputs to the following:

1. Computing Balance of Payments (BOP) by Bangko Sentral ng Pilipinas;
2. Estimating National Accounts of the Philippines (NAP) by PSA;
3. Formulating national, regional, and international policies by National Economic Development Authority (NEDA) and Department of Trade and Industry (DTI); and
4. Other pertinent activities such as research studies on trade by public and private entities.

KIND OF DATA
Administrative records data [adm]

UNITS OF ANALYSIS
Commodities or traded goods entering or leaving any of the seaports or airports of entry of the Philippines properly cleared through the Bureau of Customs (BOC).

Scope

NOTES

The Foreign Trade Statistics relate to the movements of goods between the Philippines and other countries and areas by sea or air, whether the goods are for private or government use or commercial purposes, gifts, or donations. However, the following classes of goods are excluded from the compilation of FTS:

- a. Goods simply being transported through a country, includes goods under “in transit” or “in transshipment” customs procedures;
- b. Goods temporarily admitted or dispatched;
- c. Monetary gold;
- d. Issued banknotes and securities and coins in circulation;
- e. Goods consigned to and from the territorial enclaves;
- f. Goods under merchanting;
- g. Goods under operating lease;
- h. Goods lost or destroyed after ownership has been acquired by the importer;
- i. Goods functioning as means of transport;
- j. Content delivered electronically;
- k. Goods for repair or maintenance;
- l. Waste and scrap with no commercial value;
- m. Goods entering or leaving the economic territory of a country illegally;
- n. Goods treated as part of the trade in services;
- o. Fish and other marine products landed by Philippine vessels direct from the sea;
- p. Stores and fuels purchased abroad by ships and aircraft of the Philippine registry;
- q. Goods sent through parcel post; and
- r. Goods with Free on Board (FOB) value less than USD 25.

Since 1982, goods are considered imported/exported on the date the carrying vessel/aircraft arrives/departs at the port/airport of unloading/loading.

Questionnaires

Overview

FTS are compiled by the PSA from copies of export and import documents submitted to the BOC by exporters and importers or their authorized representatives as required by law.

The PSA regularly collects from BOC the following documents which are the sources of trade data:

- a. Export Declaration (ED);
- b. BOC Informal Import Declaration and Entry (BC Form No. 177); and
- c. Single Administrative Documents (SAD) for Export Declaration (ED) and Import Entry and Internal Revenue Declaration (IEIRD).

The electronic copies of the SAD-ED and SAD-IEIRD that pass through the Automated Export Documentation System (AEDS) and Electronic to Mobile (E2M) System are provided by BOC and its authorized Value Added Service Providers (VASPs) to PSA every month through email and shared via One Drive.

These electronic copies of export and import documents are utilized to generate export and import statistics together with the processed hard copy documents collected at ports located at NCR and outside NCR.

Data Collection

Data Collection Mode

Administrative form [adm]

Data Collection Notes

The PSA regularly receives copies of export and import declaration in electronic format provided by the BOC as stipulated in the Memorandum of Agreement (MOA) on the Electronic Exchange of Information between the BOC and the PSA signed in 2015.

Other export and import documents (hard copy) that did not pass through the online system of the BOC and its authorized VASPs are collected by the Central Office (CO) staff from the BOC collection points located in the National Capital Region (NCR) three times a week. Provincial Office staff collects the hard copies of export documents from the BOC collection points located in areas outside NCR at least once a week to complete the monthly coverage of the export and import statistics.

Questionnaires

FTS are compiled by the PSA from copies of export and import documents submitted to the BOC by exporters and importers or their authorized representatives as required by law.

The PSA regularly collects from BOC the following documents which are the sources of trade data:

- a. Export Declaration (ED);
- b. BOC Informal Import Declaration and Entry (BC Form No. 177); and
- c. Single Administrative Documents (SAD) for Export Declaration (ED) and Import Entry and Internal Revenue Declaration (IEIRD).

The electronic copies of the SAD-ED and SAD-IEIRD that pass through the Automated Export Documentation System (AEDS) and Electronic to Mobile (E2M) System are provided by BOC and its authorized Value Added Service Providers (VASPs) to PSA every month through email and shared via One Drive.

These electronic copies of export and import documents are utilized to generate export and import statistics together with the processed hard copy documents collected at ports located at NCR and outside NCR.

Data Collectors

Name	Abbreviation	Affiliation
Trade Statistics Division - Economic Sector Statistics Service	(TSD-ESSS)	Philippine Statistics Authority (PSA)
Provincial Office	PO	Philippine Statistics Authority (PSA)

Supervision

Central Office Supervision:

The TSD-ESSS of the PSA oversees the complete collection of all export and import hardcopy documents from all seaports/airports in the Philippines where the BOC Offices are located.

Field Office Supervision:

The Provincial Statistics Officers (PSOs) of the PSA Provincial Offices are responsible for monitoring that all export and import hardcopy documents are completely collected from all ports/airports of their jurisdiction where the BOC Offices are located.

Data Processing

Data Editing

Collected hardcopy documents are processed both in manual and machine.

Manual processing includes recording, sorting, folioing and coding while machine processing includes data encoding and data validation.

Data Editing

The hard copies of export and import documents and electronic data files are manually and machine processed to ensure completeness and quality of the data.

The PSA utilizes a customized FTS system to process both hard copies and electronic copies of documents. It is an integrated data processing system, which contains different modules to cater various stages of processing.

Manual and machine processing of export and import documents include the following:

1. Data Entry - This is done by entering selected data items from a hard copy of documents into the FTS system. It converts information from paper documents to electronic data file format.
2. Coding - This is done to translate selected data items from the hardcopy of documents to its equivalent alphabetic or numeric code following the reference files used in the FTS system.
3. Validation of Data - This is done to ensure the accuracy of the data. Quality control is assured in all processes. Data validation is run regularly through the FTS system to ensure that data are correct, complete, and consistent based on processing specifications. Monthly data review is also undertaken to ensure the quality of data.
4. Determination and exclusion of duplicate transactions - This process is done to exclude duplicate transactions in the monthly and annual release of FTS. Duplicate transactions are determined based on the following data items, namely: bill of lading, control number, country code, trader's code, port code, vessels, gross kilos, FOB value, commodity description, date of registry, and customs procedure code.

Annual statistical tables are generated after the completion and finalization of monthly statistical tables.

Other Processing

Other Processing

After coding and data entry of all folioed hard copies of export documents, consistency checking among data items is further validated to ensure high-quality foreign trade statistics

Electronic data files provided by the BOC, PEZA, and Value Added Service Providers (VASPs) are mapped and converted to a required PSA data format. These records passed through a series of data validation to ensure all errors or inconsistencies among data items are completely corrected.

Thorough validation of each record for both hardcopy and electronic files, especially the PSCC codes, is done to ensure the quality of the data. After all these consistency checks and data reviews, the preliminary import and export figures for the month are finally tabulated.

All documents received after the cut-off date, which is every 25th day of the month, are included in the generation of the revised results. The revised data of the previous month are reported during the release of the preliminary report for the current month. Revisions are made for the previous months until the annual report is released three months after the reference year. These revised data are reflected in the annual publication of the IMTS.

Data Appraisal

Data Type (DT)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 1

Source of information

This is a system generated variable for the Document Type (X stands for EXPORT while I is for IMPORT).

Literal question

Export Declaration

Year (YEAR)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Source of information

This is a system generated variable based on the date in the export declaration form.

Month (MONTH)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Source of information

This is a system generated variable based on the date in the export declaration form.

Bundle Number (BN)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Source of information

The bundle number is assigned by the PSA for easy identification of processed hardcopies of documents in export.

Folio Number (FN)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Source of information

The folio number is assigned for easy identification of processed hardcopies of documents in export.

Document Number (DN)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 3

Source of information

The document number is assigned by the PSA for easy identification of processed hardcopies of documents in export.

Customs Control Number (CN)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 6

Description

This is a 6-digit number assigned to the export document by the BOC. It is either perforated, stamped or hand written.

Source of information

It is found on the upper right portion of the export declaration. It was assigned by the BOC for the monitoring and control of the transactions.

Literal question

Export Declaration Number

Country of Destination (CO)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 3

Description

The country of destination of the exported commodity.

Literal question

Country of Destination

Free on Board (FOB)

File: EXPORT2022

Overview

Type: Discrete
Format: numeric
Width: 12
Range: 1-12

Description

The value of the commodity in US dollars.

Literal question

Total FOB Value

Gross Weight (in Kilos) (GK)

File: EXPORT2022

Overview

Type: Continuous
Format: numeric
Width: 12
Decimals: 2
Range: 1-12

Description

The gross weight in kilograms of the commodity

Literal question

Gross Weight (in Kilos)

Quantity (QT)

File: EXPORT2022

Overview

Type: Discrete
Format: numeric
Width: 12
Decimals: 2
Range: 1-12

Literal question

Marks and Numbers, Container No(s)
Number and Kind, Description of Goods

Preferential Treatment (PT)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Description

Preference refers to agreements that involves cooperation between at least two countries to reduce trade barriers-import quotas and tariffs-and to increased trade of goods and services with each other.

Literal question

Preferential Treatment

Terms of Delivery (TOD)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Description

Refers to type of agreement done between the buyer and the seller for the purchase and shipping of goods internationally.

Source of information

It is composed of two (2) digit codes that refer to the document's invoice.

Literal question

Financial and Banking Data

Insurance (INS)

File: EXPORT2022

Overview

Type: Discrete
 Format: numeric
 Width: 12
 Range: 1-12

Source of information

The insurance cost is based on the attached document's invoice as guide for the cost of insurance taken to cover the cargo.

Insurance Code (IC)

File: EXPORT2022

Overview

Type: Discrete
 Format: character
 Width: 1

Description

The insurance code determines if there is an insurance or no insurance given to the commodity.

Source of information

For EXPORT, the insurance code has three types and these are the following: code 1 - insurance cost is given, code 2 - insurance cost is imputed, and code 3 - not applicable.

Freight (FRT)

File: EXPORT2022

Overview

Type: Discrete
 Format: numeric
 Width: 12
 Range: 1-12

Description

The charges paid for the transport of the cargo.

Source of information

For EXPORT, it is based on the attached document's invoice as guide for the charges paid for the transport of the cargo.

Freight Code (FC)

File: EXPORT2022

Overview

Type: Discrete
 Format: character
 Width: 1

Description

The freight code determines if there is freight or no freight given to the commodity.

Source of information

For EXPORT, the freight code consists of the following coding scheme: code 1 - if freight cost is given, code 2 - if freight cost is imputed, and code 3 - if not applicable.

Local Port of Loading (LPU)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 4

Description

The local port where the commodity to be exported will have its final loading.

Source of information

Found in Box 27 (Port and Date of Loading) of Export Declaration Form.

Literal question

Port and Date of Loading

Local Port of Origin (LPD)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 4

Description

Refers to the port of origin of the exported commodity.

Source of information

Found in Box 8 (Importer/Consignee, Address) of Export Declaration Form.

Literal question

Importer/Consignee, Address

Feeder/Direct Carrier's Code (VES)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 7

Description

It is a 7-digit code used to determine the mode of transport used in the commodity (by air or by sea).

Literal question

Vessel / Aircraft

Type of Handling/Packing (HP)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Literal question

Marks and Numbers Container No(s)
Number and Kind Description of Goods

2019 Philippine Standard Commodity Code (PSCC2019)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 10

Description

The 2019 Philippine Standard Commodity Classification (PSCC) is the version used for the commodity classification. It is a detailed classification of all commodities on imports and exports being used for tariff and statistical purposes.

ASEAN Harmonized Tariff Nomenclature (AHTN)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 8

Description

The ASEAN Harmonized Tariff Nomenclature (AHTN) is an eight-digit HS commodity nomenclature common among the 10 ASEAN Member States.

Literal question

Harmonized System (HS) code

Customs Procedure Code (CPC)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 4

Description

The CPC is a four digit code where the first two digits represent the Requested Procedure (RP) and the last two digits represent the immediately Preceding Procedure (PP) to which the importation/ exportation was processed.

Literal question

Customs Procedure Code

Province of Origin (PO)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Description

The province name where the commodity was produced or manufactured in the Philippines.

Literal question

Province of Origin

Type of Document (TD)

File: EXPORT2022

Overview

Type: Discrete
Format: character
Width: 1

Value of Imported Materials (VIRM)

File: EXPORT2022

Overview

Type: Discrete
Format: numeric
Width: 12
Range: 1-12

Description

Value of imported raw materials is the cost of foreign materials/accessories purchased by exporter on consignment basis.

Literal question

FOB Value of Imported Raw Materials

Data Type (DT)

File: IMPORT2022

Overview

Type: Discrete
Format: character
Width: 1

Source of information

This is a system generated variable for the Document Type (X stands for EXPORT while I is for IMPORT).

Year (YEAR)

File: IMPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Description

Refers to the year the documents were processed. It is the last two digits of the reference year.

Source of information

This is a system generated variable based on the date in the import declaration form.

Month (MONTH)

File: IMPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Description

Refers to the calendar month of the year the documents were processed. It is a two-digit variable indicating the reference month of the document being processed.

Source of information

This is a system generated variable based on the date in the import declaration form.

Bundle Number (BN)

File: IMPORT2022

Overview

Type: Discrete
Format: character
Width: 2

Source of information

The bundle number is assigned for easy identification of processed hardcopies of documents in import.

Folio Number (FN)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 1

Source of information

The folio number is assigned for easy identification of processed records in import.

Document Number (DN)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 1

Source of information

The document number is assigned for easy identification of processed hardcopies of documents in import.

Customs Control Number (CN)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 6

Description

This is a 6-digit number assigned to the import document by the BOC.

Source of information

It is found on the upper right portion of the import declaration. It was assigned by the BOC for the monitoring and control of the transactions.

Country of Origin (CO)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 3

Description

Refers to the country of origin of the imported commodity.

Literal question

Country of Origin

Free on Board (FOB)

File: IMPORT2022

Overview

Type: Discrete
 Format: numeric
 Width: 12
 Range: 1-12

Description

Refers to the Free on Board Value of the imported commodity. Reported in US Dollars.

Literal question

Free on Board

Gross Weight (in Kilos) (GK)

File: IMPORT2022

Overview

Type: Continuous

Format: numeric

Width: 12

Decimals: 2

Range: 1-12

Literal question

Item Gross

Quantity (QT)

File: IMPORT2022

Overview

Type: Discrete

Format: numeric

Width: 12

Decimals: 2

Range: 1-12

Preferential Treatment (PT)

File: IMPORT2022

Overview

Type: Discrete

Format: character

Width: 2

Description

Preference refers to agreements that involves cooperation between at least two countries to reduce trade barriers-import quotas and tariffs-and to increased trade of goods and services with each other.

Literal question

Preferential Treatment

Terms of Delivery (TOD)

File: IMPORT2022

Overview

Type: Discrete

Format: character

Width: 2

Description

Refers to type of agreement done between the buyer and the seller for the purchase and shipping of goods internationally.

Source of information

This is a 2-digit number referring to the attached document's invoice as guide for the type of agreement done between the buyer and the seller for the purchase and shipping of goods internationally.

Literal question

Terms of Delivery

Insurance (INS)

File: IMPORT2022

Overview

Type: Discrete
 Format: numeric
 Width: 12
 Range: 1-12

Source of information

The insurance cost is based on the attached document's invoice as guide for the cost of insurance taken to cover the cargo.

Literal question

Insurance

Insurance Code (IC)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 1

Source of information

The insurance code is based on the entry found in Box 9b (Insurance) of IERD.

Freight (FRT)

File: IMPORT2022

Overview

Type: Discrete
 Format: numeric
 Width: 12
 Range: 1-12

Source of information

For IMPORT, it is found in Box 9a (Freight) of the IEIRD form.

Literal question

Freight

Freight Code (FC)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 1

Source of information

For IMPORT, freight code consists of seven types of coding scheme for Freight. These are the following:

- 1 - Freight Cost not included in FOB, stated in document
- 2 - Freight Cost not included in FOB, not stated in document, auto impute(impute (10%))
- 3 - Freight Cost included in FOB, stated in document
- 4 - Freight Cost included in FOB, not stated in document, auto impute (10%)
- 5 - Freight Cost not included in FOB, for multiple commodities only, freight cost is computed based on the ratio of the total gross weight value multiplied to the gross weight value of each item
- 6 - Freight Cost included in FOB, not stated in document, Auto impute (10% of FOB)
- 9 - No Freight cost for vessel, aircraft arriving under its own power

Local Port of Unloading (LPU)

File: IMPORT2022

Overview

Type: Discrete
Format: character
Width: 4

Description

The local port where the commodity was unloaded.

Source of information

Found in Box 29 (Importer/Consignee, Address) of IEIRD.

Literal question

Importer/Consignee, Address

Local Port of Destination (LPD)

File: IMPORT2022

Overview

Type: Discrete
Format: character
Width: 4

Description

The port of final destination of the imported commodity.

Source of information

Found in Box 29 (Importer/Consignee, Address) of IEIRD.

Literal question

Importer/Consignee, Address

Feeder/Direct Carrier's Code (VES)

File: IMPORT2022

Overview

Type: Discrete
Format: character
Width: 7

Literal question

Vessel / Aircraft

Type of Handling/Packing (HP)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 2

2019 Philippine Standard Commodity Code (PSCC2019)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 10

Description

The 2019 Philippine Standard Commodity Classification (PSCC) is the version used for the commodity classification. It is a detailed classification of all commodities on imports and exports being used for tariff and statistical purposes.

ASEAN Harmonized Tariff Nomenclature (AHTN)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 8

Description

The ASEAN Harmonized Tariff Nomenclature (AHTN) is an eight-digit HS commodity nomenclature common among the 10 ASEAN Member States.

Literal question

Harmonized System (HS) code

Customs Procedure Code (CPC)

File: IMPORT2022

Overview

Type: Discrete
 Format: character
 Width: 4

Description

The CPC is a four digit code where the first two digits represent the Requested Procedure (RP) and the last two digits represent the immediately Preceding Procedure (PP) to which the importation/ exportation was processed.

2019 Philippine Standard Commodity Classification (PSCC)

Title	2019 Philippine Standard Commodity Classification (PSCC)
Country	Philippines
Contributor(s)	Philippine Statistics Authority (PSA)
Publisher(s)	Philippine Statistics Authority (PSA)
Description	The 2019 Philippine Standard Commodity Classification (PSCC) is the latest revision of the country's commodity classification. It is a detailed classification of all commodities on imports and exports being used for tariff and statistical purposes. The 2019 PSCC is an integration of the 2017 ASEAN Harmonized Tariff Nomenclature (AHTN) based on the 2017 Harmonized Commodity Description and Coding System (HS) issued by the World Customs Organizations (WCO) and the Standard International Trade Commodity (SITC) Rev. 4, by the United Nations Statistics Division (UNSD).
