ID NUMBER

PHL-BAS-CRSOP-2006-v3.0

Version

VERSION DESCRIPTION

v3.0 - Raw data edited at the Central Office, anonymized dataset for public distribution.

PRODUCTION DATE

2007-07

Overview

ABSTRACT

Information on onion farming will help provide directions to agricultural entrepreneurs and investors. It also serves the statistical requirements of onion growers and policy makers for planning and decision making regarding onion production and marketing.

The survey aimed to generate updated data on levels and structure of production costs and returns. Specifically, it was conducted to determine the indicators of profitability such as gross and net returns, returns above cash costs, net profit - cost ratio, etc.; usage of materials and labor inputs; and other related socio-economic variables including information on new production technologies.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Onion farmers and onion farms with harvests during the reference period as the units of analysis.

Scope

NOTES

The survey focused on generating costs and returns structure of onion production.

The scope of the survey included the following:

CHARACTERISTICS OF THE FARMERS/OPERATORS such as age, sex, main occupation, experience in onion production and highest educational attainment.

FARM CHARACTERISTICS such as total farm area, number of parcels operated by the farmer, area planted and harvested to onion and other crops, number of croppings per year, variety of onion planted, tenurial status, method of planting, month of planting and harvesting onion.

FARM INVESTMENTS such as inventory of farm investments used, year and cost of acquisition, repairs and improvement cost and estimated life and usage in the focus onion farm.

MATERIAL INPUTS such as quantity and cost of planting materials, fertilizers, mulching materials, insecticides, herbicides/weedicides, fungicides and other chemicals.

LABOR INPUTS such as labor utilization (in terms of mandays) and labor cost by type of farming activity, by source of labor and by sex and food cost incurred.

OTHER PRODUCTION COSTS such as cash and non-cash payments for land tax, land lease/rental, rental value of owned land, rentals of machine, animals and tools, fuel and oil, transport costs of inputs, irrigation fee, electricity, interest payment on crop loans, storage cost and other production costs.

PRODUCTION AND DISPOSITION such as volume of onion production and its disposition in terms of sold, harvesters' share, threshers' share, other laborers' share, landowners' share, lease rental, for home consumption, given away, used for seeds, wastage and other purposes.

BUYER INFORMATION such as major buyer of onion and the percentage of onion sold to each buyer and the perceived right price of onion.

PROBLEMS ENCOUNTERED such as problems affecting production and marketing of onion.

ACCESS TO CREDIT such as amount and source of crop loan, interest rate per annum and percentage of loan used in onion production.

OTHER INFORMATION such as membership in onion-related association and benefits derived, access to extension services, future plans of onion farmers and their recommendations to improve onion industry.

Coverage

GEOGRAPHIC COVERAGE

The survey covered the top three (3) onion producing provinces namely: Ilocos Norte, Pangasinan and Nueva Ecija.

GEOGRAPHIC UNIT

Province was the lowest level of geographic aggregation covered by the data.

UNIVERSE

The survey covered all onion farms with harvests during the last completed cropping in 2006 as the reference period.

Sampling

Sampling Procedure

The domain of the study was the province, with the last completed production cycle in 2006 as reference period. The lists of onion producing barangays by province prepared by the concerned BAS Provincial Operations Centers (POCs) served as the sampling frame for this study. The lists contained data on area devoted to onion production and number of onion farmers as of 2006. These data were obtained from the Municipal Agriculturist Offices, Agricultural Technicians, barangay officials and other key informants in the barangays and updated results of the Barangay Screening Survey (BSS).

A two-stage sampling design was employed with the barangay as the primary sampling unit and the onion farmer as the secondary and ultimate sampling unit. The barangays were drawn using systematic sampling from an ordered list of barangays with at least five onion farmers. Systematic sampling was used so that both large and small barangays in the province in terms of onion production would be represented in the sample. On the other hand, sample operators were identified using snowball approach during data collection. During the search for sample operators, a set of screening questions was applied to see to it that the samples satisfy the following criteria: 1) must be engaged in onion production, and 2) must have harvested onion in 2006

The total sample size was 100 onion growers per province and this was equally allocated to 20 sample barangays. The survey resulted in the following distribution of sample farmers by province.

PROVINCE	MULTIPLIER	RED	CREOLE	YELLOW	GRANEX	TOTAL	SAMPLE
and SHALLOT							
Ilocos Norte	95	5				100	
Pangasinan	97	3				100	
Nueva Ecija	7	89	4			100	
TOTAL	102	191	7			300	

Response Rate

Response rate of 100 percent

Weighting

Weighting is not applicable

Questionnaires

Overview

The questionnaire was a structured questionnaire written in English. It was designed in tabular form and some in question type format. The data items/variables in the questionnaire were based on the previous questionnaires with some modifications and additions.

The questionnaire was pre-tested and reviewed before its implementation.

The questionnaire consisted of 12 pages covering 13 blocks as follows:

A. GEOGRAPHIC INFORMATION includes the location of the farm such as the name of the region, province, city/municipality and barangay.

B. SAMPLE IDENTIFICATION such as the name, age, sex, highest educational attainment, main occupation and farming experience of the sample farmer/operator in onion production and the name of the respondent.

C. FARM CHARACTERISTICS such as total farm area, number of parcels operated by the farmer, area planted and harvested to onion and other crops, number of croppings per year, variety of onion planted, tenurial status, month of planting and harvesting onion.

D. FARM INVESTMENTS such as inventory of farm investments used, year and cost of acquisition, repairs and improvement cost and estimated life and usage in the focus onion farm.

E. MATERIAL INPUTS contain the quantity and cost of planting materials, fertilizers, mulching materials, insecticides, herbicides/weedicides, fungicides and other chemicals.

F. LABOR INPUTS such as labor utilization (in terms of mandays) and labor cost by type of farming activity, by source of labor and by sex and food cost incurred.

G. OTHER PRODUCTION COSTS cover cash and non-cash payments for land tax, land lease/rental, rental value of owned land, rentals of machine, animals and tools and equipment, fuel and oil, transport costs of inputs, irrigation fee, electricity, interest payment on crop loans, storage cost and other production costs.

H. PRODUCTION AND DISPOSITION such as volume of onion production and its disposition in terms of sold, harvesters' share, threshers' share, other laborers' share, landowners' share, lease rental, for home consumption, given away, used for seeds, wastage and other purposes.

I. BUYER INFORMATION includes the major buyer of onion and the percentage of onion sold to each buyer and the perceived right price of onion.

J. PROBLEMS ENCOUNTERED such as problems affecting production and marketing of onion.

K. ACCESS TO CREDIT such as the amount and source of crop loan, interest rate per annum and percentage of loan used in onion production.

L. OTHER INFORMATION such as membership in onion-related association and benefits derived, access to extension services, future plans of onion farmers and their recommendations to improve onion production

M. INTERVIEW/SURVEY PARTICULARS contain the name and signature of data collector, field supervisor/editor and PASO and date accomplished.

The questionnaire is provided as External Resources

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The questionnaire on CRS of onion production was pretested from October 10-12, 2006 in Nueva Ecija. Before the pre-test, a manual of operations was prepared together with the questionnaire. These were finalized after the pre-test. Prior to the field data collection, training was conducted to ensure that the concepts and procedures were correctly understood. The first level training was attended by selected BAS Central Office (CO) staff. They became trainers at the BAS- Provincial Operations Center (POC) participated by PASO, field staffs and hired data collectors. Part of the field training was the conduct of mock interview, dry-run exercises, discussion of problems and issues and editing procedures. The BAS CO Staff who served as the trainers supervised the initial data collection activity of the data collectors together with the POC staff. Upon return to the BAS Central Office, the BAS CO trainers prepared and submitted travel reports on the activities done in the field (province) as well as the issues/problems encountered and their recommendations.

The field data collection was undertaken by hired data collectors through personal interviews of the sample farmers who passed the requirements of the survey using the set of screening questions. The interview was conducted in the local dialect of the province. Before the data collection, courtesy call to the barangay officials was done to explain the nature and purpose of the survey and to seek permission for the conduct of such activity in the barangay.

Problems and issues encountered during field data collection were reported to the BAS CO Staff or management for their information and appropriate action. The POC also submitted to the Central Office a narrative report regarding the conduct of the survey.

Questionnaires

The questionnaire was a structured questionnaire written in English. It was designed in tabular form and some in question type format. The data items/variables in the questionnaire were based on the previous questionnaires with some modifications and additions.

The questionnaire was pre-tested and reviewed before its implementation.

The questionnaire consisted of 12 pages covering 13 blocks as follows:

A. GEOGRAPHIC INFORMATION includes the location of the farm such as the name of the region, province, city/municipality and barangay.

B. SAMPLE IDENTIFICATION such as the name, age, sex, highest educational attainment, main occupation and farming experience of the sample farmer/operator in onion production and the name of the respondent.

C. FARM CHARACTERISTICS such as total farm area, number of parcels operated by the farmer, area planted and harvested to onion and other crops, number of croppings per year, variety of onion planted, tenurial status, month of planting and harvesting onion.

D. FARM INVESTMENTS such as inventory of farm investments used, year and cost of acquisition, repairs and improvement cost and estimated life and usage in the focus onion farm.

E. MATERIAL INPUTS contain the quantity and cost of planting materials, fertilizers, mulching materials, insecticides, herbicides/weedicides, fungicides and other chemicals.

F. LABOR INPUTS such as labor utilization (in terms of mandays) and labor cost by type of farming activity, by source of labor and by sex and food cost incurred.

G. OTHER PRODUCTION COSTS cover cash and non-cash payments for land tax, land lease/rental, rental value of owned land, rentals of machine, animals and tools and equipment, fuel and oil, transport costs of inputs, irrigation fee, electricity, interest payment on crop loans, storage cost and other production costs.

H. PRODUCTION AND DISPOSITION such as volume of onion production and its disposition in terms of sold, harvesters' share, threshers' share, other laborers' share, landowners' share, lease rental, for home consumption, given away, used for seeds, wastage and other purposes.

I. BUYER INFORMATION includes the major buyer of onion and the percentage of onion sold to each buyer and the perceived right price of onion.

J. PROBLEMS ENCOUNTERED such as problems affecting production and marketing of onion.

K. ACCESS TO CREDIT such as the amount and source of crop loan, interest rate per annum and percentage of loan used in onion production.

L. OTHER INFORMATION such as membership in onion-related association and benefits derived, access to extension services, future plans of onion farmers and their recommendations to improve onion production

M. INTERVIEW/SURVEY PARTICULARS contain the name and signature of data collector, field supervisor/editor and PASO and date accomplished.

Supervision

Close supervision of field enumerators was done by the POC regular staff during data collection. As immediate supervisors, they see to it that the survey operation ran smoothly and within the target schedule. Spot checking of the data collectors and back checking of their work were also part of the field supervision to ensure that errors or incompleteness committed in the survey operation were checked and corrected immediately.

The regular POC staff were also responsible for reviewing and editing the accomplished questionnaires. These were done to check the acceptability, consistency and completeness of the information recorded in the questionnaire.

The Provincial Agricultural Statistics Officers (PASOs) and Assistant Provincial Agricultural Statistics Officers (APASOs) acted as overall supervisors in the provinces. They also conducted spot checking and backchecking, review of completed and edited questionnaires before submitting to the Central Office. A report on field data collection was prepared and sent by the POC to the Central Office.

The Regional Agricultural Statistics Officers (RASOs) were responsible for the monitoring and supervision of the survey operations in all the provinces within the region. The Statistical Operations Coordination Division (SOCD) at the Central Office monitored and coordinated the field operations.

Data Processing

Data Editing

Manual editing was initially done at the Provincial Operations Center during and after data collection using the CRS editing guidelines prepared by the Central Office. The edited questionnaires were again checked at the Central Office. Coding and encoding were likewise done at the Central Office.

The document on Editing Guidelines is provided in the Technical Documents.

Other Processing

Data entry, processing and generation of data tables were done at the BAS Central Office using the MS Excel Application. The file contains spreadsheets/worksheets with built-in formulas capable of performing complicated mathematical calculations such as totals, averages and percentages and other information. Data tables were generated by this software using the hyperlink which creates a shortcut or jump that opens a document stored on a network server, an intranet or the internet. By using hyperlinks, you can explore objects, documents, pages, and other destinations on the intranet. When you click the cell that contains the HYPERLINK function, Microsoft Excel opens the file stored at link location. The link location is the path and file name to the document to be opened as text.

Data Appraisal

Other forms of Data Appraisal

Series of reviews were done to assess the quality of the data in terms of reliability and acceptability. A comparison with the results of past surveys on input usage, labor utilization, production cost and return structure of onion was made.
