Notes: 1. Details may not add up to totals due to rounding of figures.

2. Incidence rate is computed as follows: (Occupational Injuries with workdays lost / Total employment)*1,000.

3. An estimate with coefficient of variation greater than 10% should be used with caution since the estimate is located in a very wide spread or range, thus, it is less reliable or precise.

Notes: 1. Severity rate is computed as follows: (Workdays lost due to temporary incapacity/ Total hours actually worked) * 1,000,000 hours of exposure.

2. Average workdays lost is computed as follows: Workdays lost due to temporary incapacity / Occupational Injuries resulting to temporary incapacity.

3. An estimate with coefficient of variation greater than 10% should be used with caution since the estimate is located in a very wide spread or range, thus, it is less reliable or precise.
