CONCEPTS AND DEFINITION OF TERMS

Fishing refers to the catching and gathering of fish, crustaceans, mollusks, and other marine organisms and products, including other aquatic plants.

Inland waters refer to bodies of water such as lakes, rivers, reservoirs, dams, paddy/rice fields, estuaries, marshes, and ponds usually consisting of fresh water or brackish water environments. Examples are Laguna de Bay, Taal Lake, and Agusan Marsh.

Marine waters refer to bodies of waters such as oceans, bays, gulfs and channels with seawater salinity. It is pure saltwater such as Manila Bay, Visayan Sea, Batangas Coast.

Fishing boat/vessel refers to any boat, ship or other watercraft equipped to be used for taking of fishery species in the performance of any activity related to fishing.

Gross tonnage of the boat/vessel is the vessel's "closed-in" spaces expressed in volume in terms of one hundred cubic feet (which is equal to one gross ton). This includes permanently enclosed spaces above the tonnage deck, also known as the underdeck tonnage.

Fishing gear is any apparatus, gadget, implement and other paraphernalia used in catching and gathering of fish, crustaceans, mollusks, and other aquatic products.
